

THE NEURONUTRIENT THERAPY INSTITUTE*
Consultation and Training
Director, Julia Ross, MA, MFT

CONSULTATION FOR ADDICTION TREATMENT PROFESSIONALS: INTRODUCING NUTRITIONAL RECOVERY TECHNIQUES INTO EXISTING TREATMENT PROGRAMMING

ONSITE CONSULTATION: Julia Ross and other experienced consultants can come to treatment programs to train staff members. A phone assessment of the program's training needs starts the process, which includes the following components:

- ★ Lectures (with PowerPoints) to explain the value of nutritional recovery tools
- ★ Staff members observe, then practice, assessment and nutritional neurotransmitter support therapy on themselves, each other, and then with clients.
- ★ Client Education and Menu Suggestions are made
- ★ A Plan for the Integration of nutritional components into existing program structures is made and Costs Estimated.

Follow-up help (by phone or video conference) in the implementation of the on-site training, case consultation, and troubleshooting are built into each consultation package.

DISTANCE CONSULTATION: By phone, fax and email, our consultants can review difficult cases, make suggestions, and provide case by case training to private practitioners or program staff members. We can also consult directly with clients, preferably on audio or videoconference calls, or Skype.

ADDITIONAL CLINICAL RESOURCES

SEMINARS:

- ★ Two Day Core Trainings
- ★ Six half-day Advanced Seminars on specific recovery-related topics 2010 – 2011
[\[Advanced Training Series 2010-2011\]](#)
